INDEX TO VOLUME XVIII.

A.

Acids, formation of in vegetables, 150
American Antiquarian Society, 136
———— Cicada, 47
———— Ornithology, 202 Amianthus, cloth of, 401
Ammonia, action of on iron, 146
Ammoniacal salts, solvent powers of, 255 Analysis of bile. 162
Analysis of Clinton mineral waters, 346 ———— Deweylite, 82
———— new mineral from Hoboken, 167 ———— Pollen, 402
———— Russian platina, 162
———— Silicate of iron, 164 Ancient world, vegetation of, 110
Animal putrefaction, 397 Animalcules in snow, 56
Antarctic expedition, 188 Antediluvian human remains, 393
Anthracite in the vallies of Lackawanna and Wyoming, 308
———— use of, in blacksmiths' shops, 303
———— used in making bricks, 168 Arcana of Science and Art, 202
Architecture in the United States, 11, 212 Argento-cyanate of silver, 335
Argento-cyanic acid, 334 Arragonite, new locality of, 197
Arsenic, a new test for, 58 Atmosphere and plants, temperature of, 167
Attraction, capillary, 70 Aurora borealis, irised, 72, 393

B.

Bache, Dr. on the inflammation of phosphorus in vacuo, 372
Baddeley, Lieut. on flame produced by strontian salts, 261
———— on a new instrument for taking specific gravities of minerals, 263
———— on sulphate of strontian, 104
Baltimore, minerals in the vicinity of, 78
Beche, H. F. de la, new classification of rocks by, 26
Beck, L. C. Dr. on the office of nitrogen in the air, 52
Benedict, Prof. on the vegetation of the Ottawa, 349
Berkshire county, (Ms.) history of, 387 Beryls of Fryeburg, 291
Bigbone Lick, (Ky.) osseous remains at, 139 Bile, analysis of, 162
Birds, natural history of, 389 Blacksmiths' shops, use of anthracite coal in, 303
Blood, on a peculiar principle in, 148 Bond, Dr. R. C. on wire gauze windows, 370
Bonnycastle, Capt. on the rocks of the Cataraqui, 85
Books in France and Germany, 185 Bowdoin, J. on an irised Aurora borealis, 72
Bricks, use of anthracite in the manufacture of, 118
Bridge, description of a new one, 123
Bromine, in American saline waters, 142
———— in mother water of salt springs, 154
————, combinations of, 153
————, preparation of, 154
———— with iodine in Kenawha waters, Va. 260 Butter, preservation of, 145
Byrnes, D. on variation of the magnetic needle, 380
Buckland, Prof. letter to Professor Hitchcock, 393

C.

Calcareous tufa at Chitteningo, (N. Y.) 354 Calorific effect of the voltaic pile, 173
Cannel coal in Ohio, 376 Calves, flesh of, 400 Capillary attraction, 70
Carbon, combustibility of, increased by platina and copper, 147
———, electro-magnetic property of, 175 Carbondale, 319
Carbonization of lignite, 371 Carburet of sulphur, decomposition of, 153
Cardamine rotundifolia, note upon, 356 Carstairian system, 363
Cataraqui rocks, 85 Cement for hard stones, porcelain, &c. 145
Cement for iron water pipes, 394 Charlatanisms, 401
Chemico-magnetism, 402 Cicada, American, 47
Chilton, George, analysis of mineral water by, 346 Chlorides, efficacy of, 159

Chloride of nitrogen, 155 Chlorine, a remedy in phthisis, 161
Classification of rocks, 26 Clemson, W. G. on piperin, 352 Coal, origin of, 321
Collections of New England rocks for sale, 390 Coloring materials in Canada, 186
Coloring matter in Lichen rocella, 151 Conversation on animal economy, 203
Conversations on vegetable physiology, 204 Correction for Vol. xvii. p. 390
Cyanogen, compounds of, 329

D.

Darlington, Dr. on Cardamine rotundifolia, 356
Dearborn, Gen. translation of a French paper on springs and fountains, 267
Deweylite, a new mineral, 81 Dew point, 63
Doebereiner, researches on platina by, 151 Domestic architecture, 232
Drowned persons, 170

E.

Eaton, Prof. on gold formation of U. S. 50 Editor, on anthracite region of Penn. 308
Ellet, Dr. W. H. on cyanogen and compounds, 329 Ellipse, on rectification of, 38
Elliott, Stephen, death of 390
Emmet, Prof. a new test for arsenic by, 58
———————, on the solvent powers of ammoniacal salts, 255
Emmons, Dr. E. on the heating of water, 371
———————— on the temperature of the sea, 192 Encyclopedia Americana, 202
Equations of fourth degree, 276, 308 Equivalents, circular scale of, 196
European rocks, classification of, 26

F.

Fell, Judge, on early use of anthracite coal, 308 Ferrocyanate of potassa, 331
Ferrocyanic acid, 330 Ferruginous sand formation, 243
Field, Gen. M., Meteorological table by, 366
Feuchtwanger, Dr. L. account of new minerals by, 391
———————————— irised Aurora borealis, 393
Finch, J. on circular scale of equivalents, &c. 196
Firemen, preservation of against flame, 177 Flesh of young calves, 400
Fluxions, solution of a problem in, 67 Foster, B. F. on practical penmanship, 363
Fountains, in architecture, 230 Fountains, natural, of fresh water, 379
Franconia iron works, 134, 289 Franconia minerals, 128
Fryeburg beryls, 290 Fulminating silver, 155

G.

Galvanic currents, 199 Garnets of Hanover, 126
Genesee river, upper falls of, 209 Geological specimens for sale, 390, 394
Geology of the Cataraqui, 85 Geology of the coal region of Peru, 308
——————— Kingston, (U. C.) 104 Georgia meteorite, 388
Gold formation of the U. States, 50 Gold in the Ural Mountains, 190
Gothic style of architecture, 220 Greece, ancient and modern, 250
Green, Wm. on vegetable coloring materials, 186
Griscom, Prof. notices from foreign journals by, 145, 394

H.

Hail storms, the causes and phenomena of, 1
Hayes, A. A. on bromine in Saratoga waters, 142
———————— on the dew point, 63
Heidelberg geological specimens, opinion of, 394
Helvetic Society of Nat. Hist. 168 Hildreth, Dr. S. P. on American cicada, 47
Hildreth, Dr. S. P. meteorological observations by, 368
Homergue's essays on silk, 382 Hopkins, Lieut. on sesqui-sulphate of mercury, 364
Howe, Dr. S. G. on Greece, 250 Hydriodate of potassa, a test for arsenic, 58
Hydriodic ether, 161 Hydro-bromic acid and potassa in Saratoga waters, 142
Hydro-carbon, new mineral, 164
Hydrocyanic acid, effect of on muriatic and sulphuric acids, 146
———————, 157 under peculiar circumstances, 201

I.

Ice, artificial preparation of, 145 Indian summer, cause of, 66
Indigo, manufacture of in U. S. 237 Iodide of potassium, a test for arsenic, 58
Iodine, crystalline form of, 84 Ioduret of azote, preparation of, 354
Iron, silicate of, 164 Iron works of Franconia, 134, 289 Iron works of Sweden, 173

J.

Jones, G. on use of anthracite in blacksmiths' shops, 303

L.

Lackawanna valley, anthracite of, 308 Lepidolite of Paris, (Me.) 296
Lichen rocella, coloring matter of, 151
Light, apparatus for its instantaneous production, 148 Light, on deflection of, 176
Lightning rods, mode of adjusting, 361 Lignite, carbonization of, 371
Localities of minerals, 78 Long, Lieut. description of a frame bridge by, 123
Lyceum of Nat. History of New York, 193

M.

Mac Culloch, Dr. J. on remittent diseases, 338
Magnetic influence of the solar beam, 181
——————— violet rays, 171 Magnetic needle, variation of, 380
Magnetism, effects of in chemical combinations, 385
Mansfield, Col. obituary of, 208 Marine ventilator, a new one, 75
Mather, Lieut. on the crystalline form of iodine, 84
——————— localities of minerals by, 360
——————— on the crystalline form of Xanthite, 359
Meade, Dr. William, on anthracite in making bricks, 118
———————, on mica for spectacle glasses, 374
Medals, Thomson's scientific ones, 198 Mercury, sesqui-sulphate of, 364
Metallic decompositions, 403 Meteorite of Georgia, 388
Meteorite of Tennessee, 378, 200 Meteorological remarks, 367
Meteorological tables, 366 Milk, preservation of, 152
Mineral, analysis of a new one, 167 Mineralogical journey, 126 and 289
Minerals in the Ural Mountains, 163 Minerals, localities of, 78
——————— not described in common works on mineralogy, 391
Morton, Dr. S. G. on the ferruginous sand formation of N. J. 243
Mulberry tree, culture of in the U. S. 278
Muse, Dr. J. on animalcules in snow, 56 Myology, elements of, 203

N.

Natural Sciences, Helvetic Society of, 170 New York, History of, 206
Nitrate of silver, reduction of, 400 Nitrogen, office of in the air, 52
North American Medical and Surgical Journal, 203

O.

Ohio, cannel coal in, 376 Oil in oleaginous plants, 150
Olmsted, Prof. on hail storms, 1 Olmsted, Prof. on adjusting lightning rods, 362
Optical surgery, 179 Organic remains of ferruginous sand formation, 243
Osseous remains of Bigbone Lick, 139 Obituary, 208, 390

P.

Partridge, Wm. on indigo, 237 Paris minerals, 293
Pascalis, Dr. on culture of silk in U. S. 278 Percussion powder, 156
Peruvian geography and geognosy, 182 Phosphorescence of sea water, 166, 187
Phosphorus, inflammation of, in vacuo, 147, 177 Piperin, preparation of, 352
Phosphuretted hydrogen, effect of in metallic decompositions, 403
Platina, analysis of, 162 Platina, spongy, 398
——— researches respecting, 151 ——— in the Uralian mountains, 190
Plumbago, instead of oil in watches, 179
——— of Sturbridge, (Mass.) 377 Poisonous confectionary, 157
Pollen, analysis of, 402 Porcelain clay, 199, 384
Porter, J. on American Antiquarian Society, 136 Potatoe cheese, 385
Premiums for useful inventions in agriculture, 382
Providence Franklin Society, 195 Prussian blue, 332 Public monuments, 229

R.

Rectification of the ellipse, 38 Reliquiæ diluvianæ, 393
Rensselaer School flotilla, 200

Review of Dr. MacCulloch on remitttent diseases, 338
Revue Encyclopedique, 184 Rock crystal, substituted for glass, 191
Rock specimens, for sale, 390 Rose quartz of Paris, 297

S

Salina, bromine in the brine of, 143 Sanford, Prof. E. on calcareous tufa, 359
Scale of chemical equivalents, 184 Sea water phosphorescence of, 166, 187
Sewer, cleansing of, 161
Shepard, C. U. on the Deweylite, 81
——— mineralogical journey of, 126, 289
Siliceous minerals, decomposition of, 404
Silk, culture of in the United States, 278
—— manufacture of in United States, 382
—— practical instructions concerning, 207 Snow, animalcules in, 56
Society of arts, manufactures and commerce, 390 Southern agriculturalist, 208
Specific gravities, a new instrument for, 263 Spectacles, use of mica in, 374
Spider, manner of forming its web, 165 Springs, and fountains, artificial ones, 267
Staurotide of Mink Pond, 127 Statistics, 182
Strong, Prof. on capillary attraction, 70
——— solution of a problem in fluxions, 69
Strontian as characterized by a red flame, 261
Sulphates, decomposition of in water by organic matters, 147, 156
Sulphuretted hydrogen, bad effects of, 160
Sulphuric acid, action of on hydrocyanic acid, 146
Swift, Dr. P. on the temperature of the sea, 191 Sympathetic ink, 148

T.

Talcose slate, containing the gold of Carolina, 50
Tappan, Judge, on cannel coal of Ohio, 376
Temperature of the atmosphere and plants, 167 Temperature of the sea, 191, 192
Tennesse meteorite, 200, 378 Thomas, D. geological facts by, 375
Thury, M. le Vicomte de, on artificial springs, and fountains, 267
Tourmalines of Paris, (Me.) 295 Tourmalines, spontaneous electricity of, 301
Transition rocks of the Cataraqui, 85

U.

United States, architecture in, 11, 212 United States, culture of silk in, 278
——— manufacture of indigo in, 237
University of New York, report to the regents of, 385

V.

Vauquelin's place in the Institute, 185 Vegetable coloring materials in Canada, 186
Vegetables, the formations of acids in, 150 Vegetation of the Ottawa, 349
Vegetation of an ancient world, 110 Ventilator, marine, a new one, 75
Violet ray, magnetic influence of, 171 Voltaic pile, calorific effects of, 175

W.

Wadsworth, D. on the upper falls of the Genessee, 209
Ward, S. on fresh water fountains, 379 Watch, a remarkable one, 180
Water, heating of, 371 White mountain minerals, 290
Whiting, S. on a new marine ventilator, 75
Wilder, C. on rectification of the ellipse, 38 on resolution of equations, 276
Wilson, Rev. Mr. on adjusting lightning rods, 361
Wire gauze windows, a protection against aerial poisons, 370
Witham, Henry, on the early vegetation of our globe, 110
Wood, change of color in, 404 Wyoming, valley of, its geology, 308
Wyoming, history of, 387

X

Xanthite, crystalline form of, 359
